	P.O.C. Email Address andrew.bridge@briston.com.au		Mobile No. 0404 036 591

Briston Training and Development Pty Ltd (Briston) is a Registered Training Organisation (RTO) based in Brisbane, Qld. The company operates in three primary service areas, namely training design, training delivery, and provision of training support services. While Briston has the capacity to deliver nationally recognised qualifications from its own scope, the company also partners with several other RTOs including Evocca College, Outsource Services, and Shoreline Learning and Development to deliver a wide range of qualifications to clients across all industry groups.

Briston commenced delivery of training in January 2010 for its first client within the corrective services industry. Initial programs were custom designed for delivery to inmates within a maximum security remand center in Brisbane focusing on community based behaviors, and on provision of peer support roles within high risk units. The program was quickly expanded to incorporate delivery of "in Unit" Health and Fitness programs and LLN tutor training. Since this time, Briston has designed and delivered more than 15 different education programs for correctional centers using delivery methods and systems, which integrate seamlessly with security and operational requirements within each facility.

In April 11, Briston restructured to form a dedicated training design cell responsible for the conduct of specialized training analysis and design, developing customized courses for delivery in response to client's needs.

abc

This cost allows for an initial consultation regarding the desired output of the overall project, three consolidated client feedback rounds, and the time and costs associated with producing audio scripts and voice.

The three feedback rounds consist of one following submission of an initial sample module to confirm style, structure and understanding of intent, a second following submission of all first draft modules and a third prior to final submission of the courses. As Briston guarantees the standard of our work and endeavours to set the standard amongst eLearning providers, we will ensure that all submitted materials are developed to meet the expectations agreed during project acceptance and in the three provided review rounds.

Conclusion – Moving forward

Once you have made the decision to engage us for this project, we recommend a scope confirmation meeting to ensure that all parameters have been identified correctly, to discuss and review base materials, and to confirm design timeframes, processes and deliverables.

Should you have questions on this project or once you are ready to proceed, please feel contact me on the details below at any time. I would be happy to meet with you at your convenience should you wish to discuss the project or our capability in person.
